

CodeAlpha_PhishingAwarenessTraining

Project Overview

This project was completed as part of the CodeAlpha Cyber Security Internship.

The objective of this project is to educate users about phishing attacks, social engineering techniques, and cybersecurity best practices. The presentation explains how phishing works, how to identify phishing emails and fake websites, and how to stay safe online.

Features

- Introduction to Phishing Attacks
- Types of Phishing
- Recognizing Phishing Emails
- Identifying Fake Websites
- Social Engineering Tactics
- Real-World Examples
- Cybersecurity Best Practices
- Interactive Quiz

Tools Used

- Microsoft PowerPoint
- GitHub
- VS Code (Documentation)

Files Included

- Phishing_Awareness_Presentation.pptx
- README.md
- Quiz Questions
- Screenshots

Learning Outcomes

Through this project, I gained knowledge about:

- Common phishing techniques
- Social engineering attacks
- Email security awareness
- Safe browsing practices
- Cybersecurity awareness training

Conclusion

Phishing remains one of the most common cyber threats. User awareness and proper security practices are essential for protecting personal and organizational information from cybercriminals.
